FLEU 5S Design Features and Technical Specification

Applications **CHEMICAL**

Chemicals TDI, MDI, Ethylenoxid

Chlor, Alkali, Pulp and Paper, desalination of seawater

Polymers, Polypropylene plant

ammonia, Fertilizers

Hydrofluoric Acid

Technical Details

Body Materials Carbon Steel 1.0619, ASTM A216 WCB, 1.1138, ASTM A352 LCC/LCB

Stainless Steel 1.4408, ASTM A351 CF8M, 1.4308, ASTM A351 CF8

Size range 1/2" - 24" / DN15 - DN600

Pressure range 150lbs - 300lbs / PN10 - PN40

Temperature range -50 up to +280

Connection Flanged End, Weld End

Options Different sleeve and packing materials, Firesafe, Actuation, Full and reduced port

Certificates ISO15848-1 (BH CO3 200°C SSA 0), TA-Luft/VDI 2440, DGRL 2014/68/EU, AD 2000, API607

Design features

1. Camprofiled body cover joint gasket.
2. 360° port lips on body prevent cold flow and deformation of the sleeve, eliminating the chances that the sleeve will rotate during thermal cycling.
3. Pressure relief hole depending on condition as for Hydrofluoric Acid, Chlor, Oleum.
4. With locking device.
5. 5"/DN125 and larger: Gear box.
6. Dead cavity free.
7. Maintenance free, self-lubrication, these valves prevent accumulation or contamination of process media.
8. Plug adjustability.
9. Mounting-flange for actuators acc. to DIN ISO 5211.
10. Anti-static design.

Design standards for DIN valves

1. Design acc. to AD 2000 A4, ATEX 2014/34/EU, EN 12516.
2. Inspection and test acc. to EN 12266
3. Face to face dimension:
For DN15-DN100, acc. to EN 558-1, G1;
For DN125 and larger, acc. to EN 558-1, G3 .
4. Dimension of connection end flange acc. to EN 1092-1, From B1, BW end acc. to EN 12627.

Design standards for ANSI valves

1. Design acc. to ASME B16.34.
2. Inspection and test acc. to API 598.
3. Face to face dimension acc. to ASME B16.10 .
4. Dimension of connection end flange acc. to ASME B16.5, BW end acc. to ASME B16.25.

FLEU 5S Low Emission Features and Benefits

FLEU 5S stem seal System

The 5S Soft Seated Sleeved Plug Valve is with Stem packing, permits fugitive emissions control ISO 15848-1BH CO3 200°C SSA 0 and TA Luft at temperatures and meet the stringent emissions standards in the chemical industry.

The live-loaded design optimizes sealing performance (self-adjusted) and extended service life without Packing or sleeve adjustment.

Options:

Different packing materials to suit different temperatures and applications, PTFE or Viton Packing up to 200°C and graphite packing up to 280°C

Different sleeve material

The patented 5 seal system including the live-loaded stem guarantee the absolute seal to atmosphere and seat even under temperature change.

Details about the 5S seal system:

1. Primary Seal to Atmosphere

360° port lips and high pressure ribs ensure the seat seal and primary seal to atmosphere. Plug is adjustable.

2. Secondary Seal to Atmosphere

Enabled wedge ring and plastic diaphragm design ensuring 2. protection to stem seal and body cover joint.

5. Packing adjustable if necessary

Cutway view on 5S

3. and 4. seal to atmosphere Patented live-loaded stem system

Optimizes sealing integrity to Atmosphere

Stem packing depending on operating conditions.

Various packing as PTFE PFA, Viton, Graphite
